A DOZEN GOOD REASONS WHY THE 404 SERIES IS YOUR BEST BUY IN MOBILE COMMUNICATIONS MICROPHONES

1. World Famous "Controlled Magnetic Cartridge" — Field-proved throughout the world under extreme conditions of military and commercial use.
2. Corrosion Proof “Armo-Dur” Housing—Immune to severe weather conditions. Unaffected by corrosive materials normally encountered or used: oils, grease, fumes, salt spray, etc.
4. Constant Impact Strength — Withstands mechanical shocks under varying conditions of temperature — with uniform impact resistance. (Varies only 25% in impact strength through a range running from -40° to 165° fahrenhein — as compared to a variance of 95% for standard die-cast housings.)
5. Eliminates Shock Hazard — Special “Armo-Dur” housing is an insulator — eliminates electrical shock hazard.
6. Reduces Operator Fatigue — Under actual operating conditions, the complete microphone (including plug and cable) weighs only 8 oz., 42.9% less than similar die-cast microphones. The net weight of the microphone, plug, and cable is 12 oz., 33.3% less than similar die-cast microphones.
7. No Vibration Fatigue — “Armo-Dur” eliminates shattering, breaking or cracking of housing often caused by continuous vibrations.
8. Color Permanence — Color runs throughout the “Armo-Dur” housing. It is unaffected by handling, sun and corrosive fumes or materials which are normally encountered or used.
9. Low Thermal Conductivity — Feels normal to the hand in extreme heat or cold.
10. “Life-Time” Hang-Up Button — Unique shock mounting prevents button "pall out".
11. Fully Shielded — A high permeability shield and the vacuum metalizing on “Armo-Dur” case provide effective shielding against electro-static and magnetic fields.
12. No Sacrifice of Quality For Price — Rigid laboratory and field tests on every component assures long-life trouble-free service.

HERE’S PROOF OF ITS RUGGEDNESS

...dragged behind swiftly moving autos:

It is estimated that the Model 404 Microphone withstood over 35,000 separate shock impacts during a 3.3 mile test drive at a speed ranging from 20 to 30 miles per hour. This is far greater punishment than would ever be required of a microphone in a lifetime of abnormally severe handling.
COMMUNICATIONS MICROPHONES
